

chuayong zu

Full Stack Developer

Senior Front-End Developer with 5 years of proven leadership and meaningful contributions to teams of varying size and scope. I have a strong foundation in web development technologies including HTML, CSS, JavaScript, React, Vue.js, Angular, Express, python and Django. I am skilled in developing responsive and user-friendly interfaces, as well as integrating with backend systems and APIs. With a keen eye for design and attention to detail, I am able to produce high-quality code that meets project requirements and exceeds user expectations.

WORK EXPERIENCE

Full Stack Developer NovaTech Innovations

07/2021 - 08/2023

My primary responsibility would be to design, develop, and maintain software applications that run on both the front-end and back-end. This includes working with various programming languages, frameworks, and tools to build robust and scalable applications.

Backend Developer ByteWave Technologies

07/2020 - 06/2021

My role would involve working on the server-side development of the company's software or website. I would be responsible for designing, building, and maintaining the logic and functionality that powers the application.

React Developer Northern Lights Web Design

01/2019 - 06/2020

My role would involve working on the front-end development of web applications using the React JavaScript library. You would be responsible for building user interfaces, implementing interactive features, and ensuring the performance and responsiveness of the application.

Frontend Developer CodeCraft Studios

10/2017 - 06/2018

My role would involve working on the client-side development of web applications. I would be responsible for designing and implementing the user interface, ensuring a seamless and visually appealing experience for users.

EDUCATION

Master of Science in Information Technology (MSc(IT)) Nanyang Technological University (NTU)
