

Robert Wang

Senior Fullstack developer

Senior Full Stack Developer with 8 years of proven leadership and meaningful contributions to teams of varying size and scope. I have a strong foundation in web development technologies including HTML, CSS, JavaScript, React, Vue.js, Angular, ExpressJS, Python and Django. I am skilled in developing responsive and user-friendly interfaces, as well as integrating with backend systems and APIs. With a keen eye for design and attention to detail, I am able to produce high-quality code that meets project requirements and exceeds user expectations.

WORK EXPERIENCE

Full Stack Developer Forelogix Interactive

07/2020 - 08/2023

My primary responsibility would be to design, develop, and maintain software applications that run on both the front-end and back-end. This includes working with various programming languages, frameworks, and tools to build robust and scalable applications.

Achievements/Tasks

- Designed and developed 20+ front-end and back-end applications utilizing React, Angular, Vue.js, Node.js, Python and Laravel.
- Update existing website With MySQL Database into website with MongoDB.
- Worked closely with the back-end team to display data using the Custom Components, library Components, Redux , Redux Saga
- Implemented various screens for the frontend using React.js and used various predefined components from NPM (Node Package Manager)and redux library.
- I developed edit props, sub-rendering, and conditional rendering of components in React and Vue.js with pxCode.

React Developer NEXPlatform

01/2015 - 06/2019

My role would involve working on the front-end development of web applications using the React JavaScript library. You would be responsible for building user interfaces, implementing interactive features, and ensuring the performance and responsiveness of the application.

Achievements/Tasks

- Collaborated with web designers, back end developers and UX designers to design, build, test and improve web products.
- Designed and built 3 mobile applications using React Native
- Migrated a multi-page user experience into a single page app, improving customer engagement by 10%.
- Participated in each step of the product development process from ideation to development improvement for features reaching over 150,000 users.
- Learned practical debugging skills by watching senior workers check and polish code to improve the functionality and performance of web products and computer programs.
- Helped maintain code quality, organization, and automatization for 6+ applications
