WORK EXPERIENCE

Resume Worded, New York, NY   09/2015 – Present
Augmented reality startup with 50+ employees and $100m+ annual revenue
Java Full Stack Developer

- Championed a quarterly code review process using GitLab templating, which boosted code quality and delivery speed by 49%, an improvement from previous years.
- Enhanced REST API service performance from 55 to 10 seconds by executing multi-threading/asynchronous solutions via Spring to meet 20+ industry SLOs.
- Interviewed potential team members by helping HR during its engineering onboarding and training program for 30+ rookie engineers.
- Assisted in making security improvements to RW's pipeline via sonarQube and initiated CI/CD changes that combined built-in quality checks, exceeding management's safety requirements by 60%.

Polyhire, London, United Kingdom   10/2012 – 08/2015
Provides quality assurance and control testing for global markets
Software Developer

- Streamlined local development process by creating docker instances of a parallel legacy and modern application, reducing testing time by 120 minutes.
- Partnered with a 10-man engineering team to plan and design the conversion of a legacy monolithic Java 5 application to a microservice architecture using Java 8+ and Angular 2+.
- Monitored real-time production logs and performed an analysis that support 20+ proprietary applications within 45 days of employment.

Growthsi, London, United Kingdom   07/2010 – 09/2012
Career training and membership SaaS with 150,000 paying users
Application Engineer

- Diagnosed and fixed issues in a popular customized software licensing program, which boosted customer satisfaction and revenue by 90%.
- Detected vulnerabilities in the enterprise-wide multi-platform application suite of Growthsi with 15K lines of codes; recorded zero disruption to system performance.
- Resolved memory leaks that had plagued applications for 24 months, which helped improve program speed by 85% YoY.
