About me

Prolific, Front end web developer with a passion for metrics and beating former "best-yets.", Well-versed in Front-End development. Recently throughout my 3 years career as a software developer I've focused on developing scalable and well documented code. I enjoy working collaboratively but can also run with projects on my own. Decreased rework by 18% and costs by 12% and consistently receive high user experience scores for all web development projects.

Skills

HTML, CSS, Javascript, JQuery

Saint Johns River State College, United State
2013 - 2018

Tomas Lee

Front-end Developer

Work experience

Frontend developer

From November 2018 to September 2019 LEONI

- This company offer web development and graphic design services.
- I was responsible for design mockups, content management and React theme customization. Most of the React work was theme configuration and CSS changes.
- Maintained graphic standards and branding throughout the product's interfaces.

React Developer

From October 2019 to April 2020 Luxoft

- Worked on React and Node.js, Implemented websites, mobile applications, and landing pages from concept through deployment.
- Standardized all output with a new, responsive, mobile-first approach and strategy.
- Assessed UX and UI designs for technical feasibility.
- Developed standard and ad hoc reports in graph format as required.
- Collaborated with product team members to implement new feature developments.

Full stack Developer

From April 2020 to May 2021 Baker Tilly US

- We primarily used MERN Stack. 60% of my work was doing front end development, 20% back end development and the remaining 20% was dev-ops/sys admin related tasks. We had a few system admins for a 50 persons + company.
- I was occasionally asked to do things such as migrating test database data between environments, doing jenkins builds/minor build plan tweaks, configuring webpack/or ui/unit testing frameworks.

Frontend Developer

From September 2021 to January 2023 Livingstone Research

- I was invited as a team leader at this company, Collaborated with 6 web developers, project manager, graphics designer, two QA engineers of the Livingstone company based on daily meeting & discussion, periodically updates via GitHub. Worked as senior development leader in a team.
- Mentored 4 new junior front-end developers on team in expanding JavaScript, React, and Angular skillset.
- Rewrote HTML to meet industry and company standards for SEO and Accessibility.
- Git Manage: Worked on sub-branch, Review code and merge to main branch.
